Issues

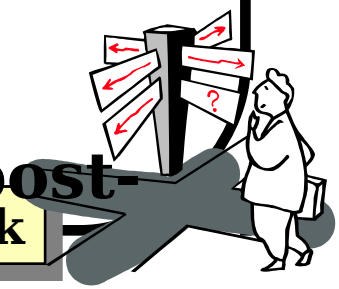
Which Way To Go?

Army Standing Committee Meeting -- Mar 2007

Issues

Post RFP Award Reviews

- **Issue: FDED's role in post-RFP Award**
  - **Some districts believe the design is over at RFP-award**
  - **FDED not considered a player at this point**
- **Problem: RFP is not a final design. FDED must still:**
  - **Review A/E design for compliance & adequacy**
  - **Advise USACE on shortcomings**
  - **Represent Army user's needs**
- **Status: Educating Districts on FDED post-RFP role.**



Issues

One Army Designs

- **Issue: MCANG IS/IT lagging Active & Reserve**
  - **BCA building many USANG Reserve Centers**
  - **Most lack modern I3A IS/IT**
- **Problem: USANG not familiar with I3A and current practices**
- **Status: One USANG Workshop per year**
- **Recommendation: Integrate USANG into MILCON at ASC and other levels.**

Issues

Model RFP

- **Issue: District implementation quite different**
  - **Some results are complete and usable**
  - **Some are bare-boned**
- **Problem: We can't get 'standard' functionality:**
  - **Lack of minimum detail makes some projects suspect**
  - **Must convince Districts of importance of IS/IT**
  - **Norfolk consistently excellent**
- **Status: Working on a project basis.**
- **Recommendation: Standardize 'best'**
